5 April 1965

	Dear Jim:
STATINTL	You will recall a message from DNRO requesting the transfer toat Hycon of two 66" Lanyard lens. I arranged for Maury to pick up instruments 07 and 08 at the depot, return them to A/P where will then remove the glass and re-package the statistic counterpart at Boston to authorize STATINTL to remove the glass as soon as the two units are pulled from
	storage.
	Would appreciate your asking if they have available the two containers for shipping the 66" lens. These things weigh 250 lbs. each and will have to be handled with care. The shipping containers are fairly important. I believe the only available shipping containers are at Boston.
